

AG-DATA SERVICES FOR ENHANCED IRRIGATION MANAGEMENT

NEW! REIN CLOUD ONLINE SOFTWARE

Learn how ReinCloud is making it easier to manage irrigation.

REINCLOUD™ AG-DATA SERVICES

Introducing a better way to collect and display field and irrigation data for improved irrigation management.

Built for growers and producers worldwide, ReinCloud™ Ag-Data Services is an online software that helps you combine field and irrigation data into one easy-to-use dashboard. Whether it's irrigation monitoring and controls, soil moisture or weather data you're looking for, ReinCloud is easy-to-use, informative and ready to put your ag-based data to work. Here's a few of the features that make ReinCloud the right choice for your operation:

Responsive Display

Get everyday access on your devices whether it's a smartphone, tablet, laptop or computer.

Navigation Menu

Notifications

Stay informed on system status through in-app notifications.

Sites, Weather & Map

Organized data by sites, zones and equipment.

Dashboard

Quickly view irrigation system status other widget data all in one dashboard.

Equipment Search

Search for your equipment by site and zone.

Run Queue

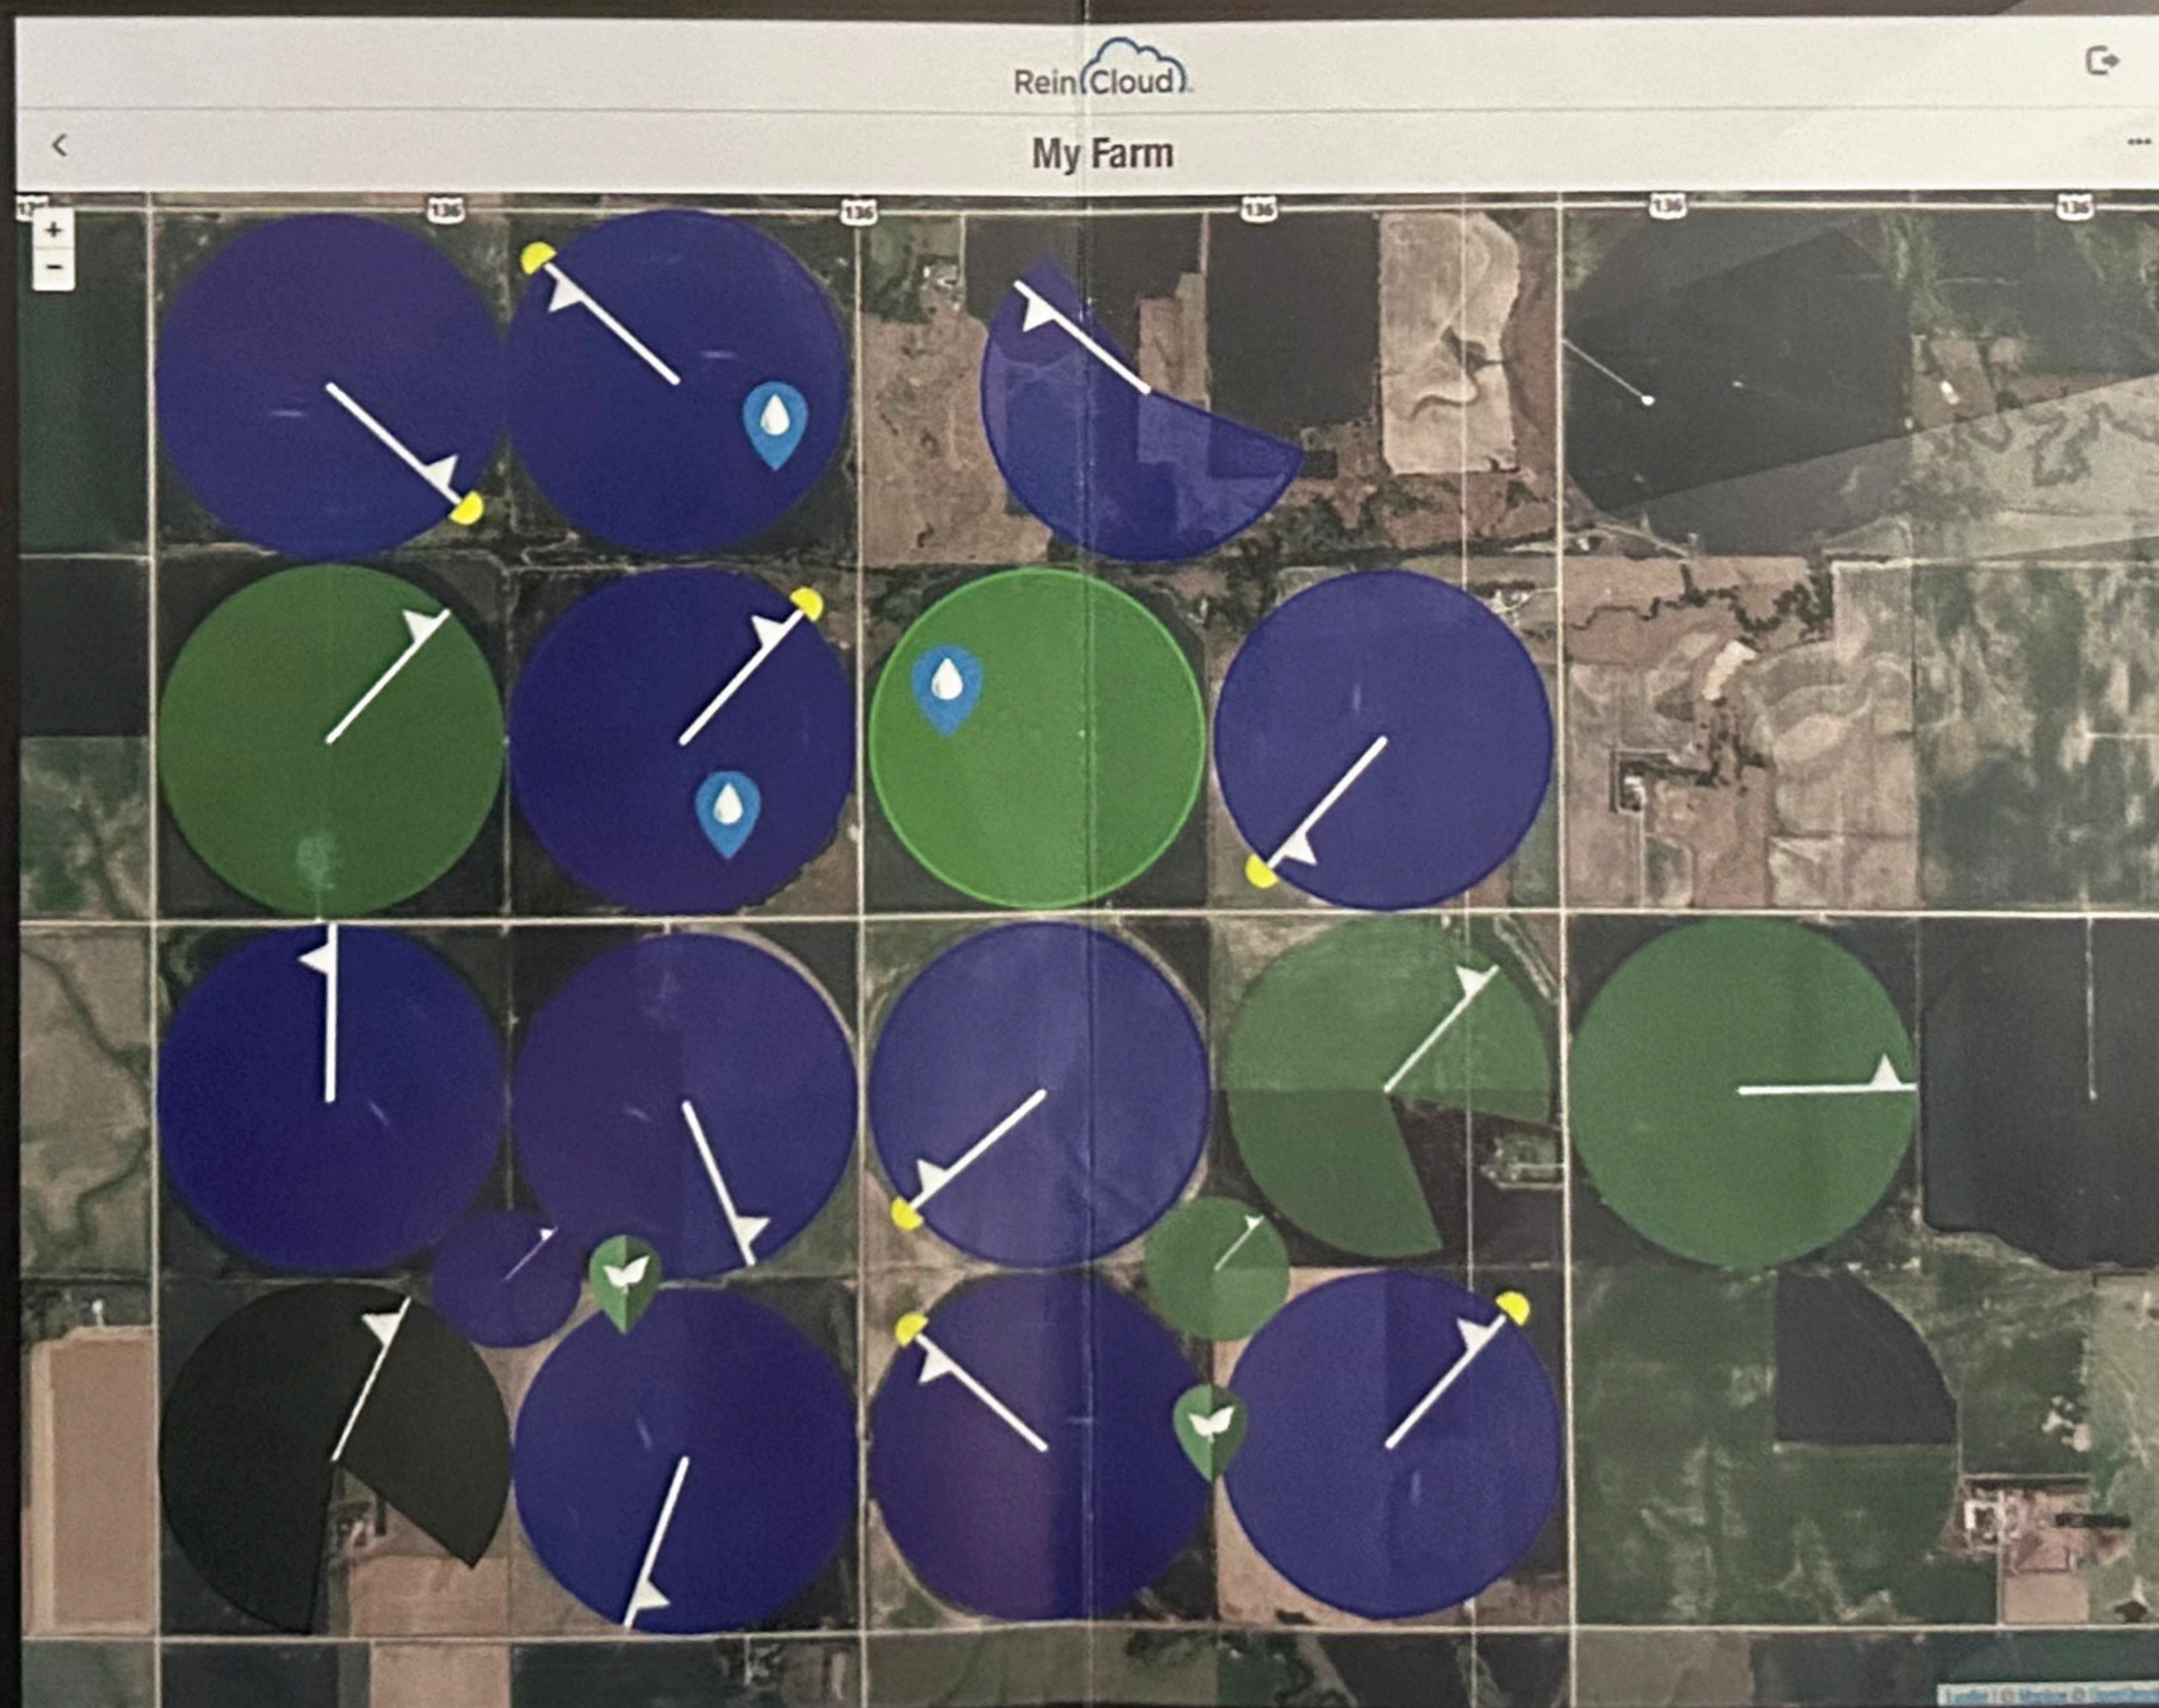

Check the status of equipment controls.

Help & Support

Access tutorials or chat with a representative.

Your Profile

Easily adjust notification delivery and account settings.

Irrigation Widgets

Irrigation widgets are smart icons that can display data at a glance. Click on a widget for more details and equipment control options.

Field Sensing Devices

Check soil moisture, weather, and other environmental data with compatible ReinCloud Ready™ products.

Software Features

ReinCloud includes the following features:

- Safe and secure data services
- Data organization by site and zone
- Customizable dashboard
- Access on everyday devices
- Notifications through option of Text, Email, App or Voice.
- Irrigation Equipment Widgets
- Soil Moisture & Weather Equipment Widgets
- Reports
- Data Sharing
- Weather Widget powered by WeatherUnderground™
- Aerial Map View
- Data graphing

Built using the latest in data collection, storage, processing and presentation, ReinCloud is a great tool for any producer.

REINCLOUD READY™ PRODUCTS

Partnering with the best ag-based hardware companies around, the following ReinCloud Ready™ products are ready to put your data to work within your ReinCloud Online Software.
